

Ayushi Sharma

Raebareli, Uttar Pradesh

2023uee1337@mmit.ac.in — +91-9956166222 — [LinkedIn](#) — [GitHub](#) — [LeetCode](#)

Education

MNIT Jaipur, Jaipur, Rajasthan	Aug 2023 – May 2027
B.Tech in Electrical Engineering	
Lucknow Public School, Raebareli, Uttar Pradesh	Jun 2021 – May 2022
Intermediate (Science)	95%
Lucknow Public School, Raebareli, Uttar Pradesh	Jun 2019 – May 2020
High School (Class X)	90%

Technical Skills

Programming Languages: Python, SQL, Java, JavaScript

Databases Storage: MongoDB, PostgreSQL, SQL Server

Developer Tools: Git, GitHub, Postman, VS Code, Linux/Terminal, Render, Vercel

Core Concepts: Data Warehousing, ETL Pipelines, DSA, OOP, DBMS (Indexing, Joins), Operating Systems

Projects

Glycora (Predictive Healthcare Data Machine Learning Pipeline) Jun 2025 – Jul 2025
Technologies: Python, SQL, Pandas, NumPy, Scikit-learn, Streamlit [Demo](#) — [GitHub](#)

- Developed an automated **data ingestion and ETL preprocessing workflow** in Python using **Pandas** and **NumPy** for raw healthcare records.
- Handled missing values, outliers, and class imbalance using **median imputation**, feature scaling, and **Stratified K-Fold Cross Validation**.
- Conducted exploratory data analysis across 5 machine learning models (SVM, Random Forest, Gradient Boosting, Logistic Regression) to optimize data inputs.
- Deployed an ensemble **Voting Classifier** pipeline on **Streamlit**, achieving an ****84%+ ROC-AUC**** score on transformed test datasets.

Cognivo (GenAI Data Infrastructure) Dec 2025 – Jan 2026
Technologies: React.js, MongoDB, Google Gemini API, JWT [Demo](#) — [GitHub](#)

- Architected an **end-to-end data processing pipeline** to extract, clean, and chunk unstructured document data (500-word chunks, 50-word overlap) for context generation.
- Built a **Retrieval-Augmented Generation (RAG)** pipeline that queries document chunks and feeds contextual data into **Google Gemini 2.5 Flash-Lite** models.
- Engineered a **keyword-based relevance scoring algorithm** to query, rank, and retrieve top document subsets for downstream LLM ingestion.
- Designed persistent **per-document data schemas** in **MongoDB** to store conversation state and preserve data lineage between source chunks and user prompts.
- Secured and optimized **RESTful APIs** using **JWT-based authentication** for reliable high-concurrency client-server data transfer.

Achievements

- Solved **600+ DSA and SQL problems** on **LeetCode** and **GeeksforGeeks**.
- Secured **98.03 percentile** in JEE Mains.

Extracurricular

- **Executive Member** — **The Mavericks**: Organized college events and managed digital media.
- **Executive Member** — **Unnat Bharat Abhiyan**: Contributed to rural outreach initiatives and community data collection.
